2	EDPS will monitor and follow developments	CNECT	Digital agenda	Recommendation on specific aspects of transparency, traffic management and switching in an Open Internet 2013/CNECT/005	3rd Quarter 2013	In the absence of EU guidance, some EU Member States have begun to adopt different approaches regarding net neutrality. This tendency represents a serious risk of a fragmentation of the Digital Single Market. The Commission asked the Body of European Regulators for Electronic Communications (BEREC) to undertake a fact-finding exercise on issues crucial to ensuring an open and neutral internet, including barriers to changing operators, blocking or throttling of internet traffic, transparency and quality of service. The results of this investigation identified several restrictions that consumers are subject to and unaware of. The Commission is thus preparing a Recommendation that will provide guidance on transparency, traffic management, switching and the respect of the users' privacy by ISPs when they apply certain traffic management tools (such as Deep Packet Inspection (DPI)). This aims at ensuring that Member States take similar approaches towards net neutrality and will thus contribute to the achievement of a Single Market for electronic communications. <i>The EDPS issued formal comments at consultation stage and will monitor the developments.</i>
3	EDPS may comment or issue an opinion	CNECT	Advertising	Update of the Commission's interpretative Communication on certain aspects of the provisions on televised advertising in the Audiovisual and Media Services Directive (Directive 2010/13/EU) 2013/CNECT/006	4th Quarter 2013	The last revision of the Television without Frontiers Directive introduced new rules regarding specific forms of audiovisual commercial communications. A monitoring carried out by the Commission revealed a number of issues as regards a.o. the scope and definition of specific concepts such as sponsorship, self-promotion and product placement. The issues raised up to now encompass a.o. the notion of advertising spot, editorial independence, undue prominence, significant value, surreptitious advertising, irregular sponsorship, identification of product placement, split screen advertising. It is therefore important to provide clarity on these concepts in order to ensure an equal level playing field in the application of the Audiovisual Media Services Directive (Directive 2010/13/EU). Some concepts of the former Television without Frontiers Directive had already been clarified in an interpretative Communication dating 2004 which needs to be updated to reflect the legislative changes and the new business practices arising.

The outcome of public consultation will decide on policy initiatives and its relation to existing policy.

The directive stipulates that ships built on or after 1 July 2002 and calling at a port of an EU country must be fitted with: •an automatic identification system (AIS), as well as •a voyage data recorder (VDR) system ("black box") to facilitate investigations following accidents. The Commission invites Member States to create a regulatory framework which would permit easier pilotage exemptions for operators carrying frequent shipping services. 54	EDPS will issue a formal comment	MOVE	Intelligent transport systems	Delegated Regulation on Directive with regard to data and procedures for the provision, where possible, of road safety related minimum universal traffic information free of charge to users and delegated Regulation on Directive for the provision of information services for safe and secure parking places for trucks and commercial vehicles	Adopted 15 May 2013	The first regulation will ensure that all drivers receive timely information at no extra cost. They will be warned on hazards ahead, such as an unprotected accident site or dangerous road conditions. In order to prevent a proliferation of incompatible services, the regulation establishes the core functionalities and conditions under which the information services will be developed and made available to all drivers. The information provided will include the type and location of the incident, as well as driving advice when necessary. The second regulation will improve the information to truck drivers about safe and secure parking places. It is intended to prevent dangerous parking of trucks on the hard shoulder and to help drivers comply with driving time regulation. It also guarantees interoperability and continuity of the information services along the trans-European road network, including across borders. The information will be provided through smartphones or variable road signs and will contain the description of the parking areas, the level of security and safety as well as comfort facilities. Member States will select "truck parking priority zones" where there is a shortage of places in one parking area and information will be provided on other unused parking capacities in the same zone. The EDPS was informally consulted on this initiative by the Commission and will issue a formal comment or an opinion at a later stage.

In the Blue Belt project, customs authorities will receive a timely notification report before the arrival of a "Blue Ship" to an EU port. This contains information on the current and previous voyages, including expected or actual arrival and departure times, previous and next ports of call, and other pertinent voyage information. Based on lessons learnt from the pilot project the feasibility and usefulness of establishing a permanent Blue Belt reporting system will be assessed.
56	EDPS may comment or issue an opinion	OLAF	Crime (smuggling)	Fighting cigarette smuggling	3rd Quarter 2013	This strategy would propose a comprehensive response at EU level to illicit trade in cigarettes, taking into account the losses caused to public revenue and its role as an outlet for organised crime. Better coordinated and more targeted action would include exchange of information, standard setting and international cooperation.
57	EDPS may comment or issue an opinion	OLAF	Customs and agriculture	Mutual assistance between the administrative authorities of the Member States and cooperation between the latter and the Commission to ensure the correct application of the law on customs and agricultural matters. 2011/OLAF/001	3rd Quarter 2013	Simplify and clarify the legislation, improving accessibility and achieving budget savings, as Regulation 515/97 and Council Decision 2009/917/JHA of 30 November 2009 on the use of information technology for customs purposes partially deal with the same issues.
58	EDPS may comment or issue an opinion	PSF	Research & structural funds	Missing data protection considerations when assessing project applications for European (i.e. Research & Structural) funds	2013	In light of recent developments we suggest to assess the current standing of data protection as an evaluation criteria to secure European funding (from both structural and research funds). Seeing the number of ongoing projects which focus on data processing and the level of data protection they include, it seems that data protection is not adequately considered in the evaluation phase of applications for European funding. Given that these evaluators are EU-staff, we believe it to be necessary and within our competence to point out and demand that an appropriate level of data protection is to be considered when assessing applications for European funds.
59	EDPS will follow developments	SANCO	Consumer product safety	Hygiene package legislation (revision)	3rd Quarter 2013	As the principles and requirements of the Hygiene Package opened the European Union market for all food business operators, all national measures must be currently notified to the Commission and to the other Member States at the stage of the draft in order to inform them and give them the possibility to comment on the draft legislation which after adoption becomes applicable (Directive No 98/34/EC). In the revision of hygiene package it is foreseen to simplify the current notification rules which may result in a more frequent use by the Member States of the flexibility possibilities laid down in the Hygiene package legislation.
60	EDPS will issue an opinion	TAXUD	Mutual recognition (economic)	EU-Canada mutual recognition of Authorised Economic Operators	3rd Quarter 2013	On the basis of the Community Customs Code, Member States can grant the AEO status to an economic operator meeting the following common criteria: customs compliance, appropriate record-keeping, financial solvency and, where relevant, appropriate security and safety standards. The status of authorised economic operator granted by one Member State is recognised by the other Member States. Under certain conditions AEOs can benefit from simplifications provided for in the customs rules. The mutual recognition of AEOs between the EU and third countries includes an in-depth comparison of their respective AEO programmes. This analysis includes both legislative aspects and implementation, with the aim of preparing for an eventual mutual recognition of AEOs. Achieving mutual recognition of AEO programmes between the EU and a third country facilitates trade and EU exports and also increases end-to-end supply chain security. <i>The EDPS was informally consulted on this initiative by the Commission and will issue a formal comment or an opinion at a later stage.</i>
61	EDPS may comment or issue an opinion	TAXUD	Mutual recognition (economic)	EU-China mutual recognition of Authorised Economic Operators.		
62	EDPS will issue an opinion	TAXUD	Customs information sharing	Draft Implementing Provisions of Council Regulation (EU) 389/2012 of 2 May 2012 on administrative cooperation in the field of excise duties: exchange of information on request, mandatory exchange and optional exchange	3rd Quarter 2013	The aim of the proposal for a Commission Regulation is to ensure uniform conditions for the implementation of certain Articles of the Council Regulation (EU) No 389/2012. The effective administrative cooperation between Member States requires the use of harmonised processes and standardised messages in order to exchange information on request and mandatory exchanges. The proposal therefore mainly concerns rules for the structure and content of messages exchanged in the course of administrative cooperation between Member States, as well as the relevant procedures to be followed by Member States in this context. <i>The EDPS was informally consulted on this initiative by the Commission and will issue formal comments or an opinion at a later stage.</i>

63	EDPS will issue an opinion	TAXUD	Customs information sharing	Draft Implementing Provisions of Council Regulation (EU) 389/2012 of 2 May 2012 on administrative cooperation in the field of excise duties: register of economic operators and related statistics	3rd Quarter 2013	The aim of the proposal for a Commission Regulation is to ensure uniform conditions for the implementation of certain Articles of the Council Regulation (EU) No 389/2012. The proposal concerns rules for the replication of details of national registers of economic operators and their business premises and the collection and dissemination of related statistics. Consistent rules for replication of relevant details of the national registers are essential to ensure effective control of excise movements under duty suspension. Further provisions define the use of a service provided by the Commission to allow economic operators to check the accuracy of the details held on their authorisations by the national authorities responsible. <i>The EDPS was asked for a second round of informal comments on this initiative by the Commission and will issue formal comments or an opinion at a later stage.</i>
