Security as an IETF design consideration (RFC 1543, 2223, 3552, 3365, 7258)

Realistically cannot design and standardize a new protocol without confidentiality, authentication, integrity, etc. protections or strong story for why not.

RFC 6973 extends these considerations to privacy.

Offers guidance – not a mandate.

Audience: standardization expert

W3C Privacy Interest Group
http://www.w3.org/Privacy/

Strong emphasis on privacy reviews in the group.

Writes a privacy consideration document.
