IPEN workshop 05 June 2015, Leuven (Belgium)
Practical Information

Who should participate?

The main purpose of the workshop is to bring together the different players on the data protection field, and to promote a discussion on several topics sharing our various points of view.

Workshop program

Several high level data protection experts have accepted to hold key notes and give their views on the workshop topics. After the opening keynotes, we will have the opportunity to discuss the state of play on Privacy Engineering, with the presentation of the study *"Privacy and Data Protection by Design – from policy to engineering"* from Dr. Stefan Schiffner from ENISA. Following this presentation, there will be a short account of IPEN work on the last workshop and its follow-up.

The main work will be done in four workshops, separated in two breakout sessions. In the morning, the parallel session will discuss *User control over web tracking,* with the input from Researchers from academia and representatives from Data Protection Authorities, and examine the topic of *Risk management and Design* with members of the PRIPARE project.

On the afternoon sessions, speakers will share their experience and contributions to the topic of *Standardisation for privacy engineering*. Meanwhile, members of the education field will take up the question of how to educate future professionals on *Privacy by Design.*

The final plenary will hear and discuss the findings of the breakout sessions and the EDPS will present their Opinion issued in May 2015 on mHealth, whose technology challenges can be addressed in the IPEN context.

Workshop venue

The workshop will be held in one of the meeting rooms of the Interdisciplinary Centre for Law and ICT of the Catholic University of Leuven.

A location map is available here. The building is easily reachable by public transport or on foot from the train station. You can find all the information on **how to get there** and **suggested accommodations** in a separated pdf on our website.

Networking events

To allow for more networking opportunities, an informal meeting will be organised on the night before the event, 04 June 2015. It will take place at 19:30 at the [Domus Brewery](#), located in Leuven's city centre. You can find the location on [this map](#).

We have also planned an after-party on the day of the event. This shall provide a framework for networking and exchange, and enjoying the nice city of Leuven. It will take place at 17:15 and the choice of venue is the Brasserie [De Wiering](#), only five minutes walking away from the event venue. The location on the map is in the following [link](#).

Participation conditions

Participants must register in advance. The capacity of the venue is limited and it may not be possible to accept all registrations, if there is huge interest in the event. Participation in the event is free for the invited participants. Coffee, soft drinks and a light lunch will be provided at the venue. Participants will have to carry their own travel and accommodation expenses.

Registration

A registration form is available [here](#). Participants should fill out the mandatory information. Name, first name and affiliation (project, company, and initiative) will be printed on the badge. Participants are invited to provide a short description of their project or initiative, or a short bio, which will be made available to all participants in order to support networking.

They should also indicate whether they want to attend the pre-meeting and/or the after-party.

Optionally, registrants may provide a phone number for last minute information, and information on food or other requirements that the organisers should take into account.

Security

No special permission or identity documents are required for accessing the university premises.

Time schedule

The workshop will start at 9:00 and will end at 16:00.

The check-in desk will be open from 8:30 a.m. Depending on the number of visitors arriving at the same time, the procedure may cause some delay at the entrance. Workshop participants are invited to allow some time for this and arrive with some extra time.

A light lunch will be served next to the meeting room during the lunch break. Coffee and soft drinks will be available during the day. There will be short breaks between panels.
