Dear [REDACTED]

Please find inserted below Europol's follow up to the actions issued in the EDPS prior consultation opinion on NCMEC automation (EDPS case 2023-0142):

Please note that it is Europol's intention to initiate the processing of NCMEC data with the new EU-CARES solution as of 26 June 2023. In the event of a material aspect still considered by the EDPS, Europol would request feedback from the EDPS before the envisaged go-live of the new EU-CARES solution on 26 June 2023.

Europol remains also available for providing any further clarifications as needed.

The password to the file will be sent via the established alternative means of communication.

Thank you in advance for the consideration. Have a good weekend ahead.

Best regards,

[REDACTED]
